

Kerabit Air/Vapour Barrier Tape

Päivitetty 25.6.2015 Tulostettu 12.12.2019

Leaks in the air barrier paper and vapour barrier plastic involve major moisture damage risks for structures. The Kerabit Air/Vapour Barrier Tape enables possible tears in air barrier paper and vapour barrier plastics to be sealed or repaired.

This tape is highly adhesive. The glue used is acrylic based. This tape is made of mesh-reinforced, green LDPE membrane with a silicone paper on the inner surface which must be removed before use.

The installation temperature must be a minimum of +5°C, with the temperature tolerance being -40 °C ... +80 °C.

Technical data

Manufacturer / Manufactured for	Nordic Waterproofing Oy/Lohja Plant
Country of origin	Estonia
Rolls size	50 mm x 25 m
