

Kerabit Green Roof Eaves Flashing HST

Päivitetty 21.12.2019 Tulostettu 7.5.2024

The green roof eaves flashing made of acid-resistant steel is ideal for use on green roof eaves. Acid-resistant steel is best suited to withstand any stress found in green roof systems. The flashings are two metres long.

Technical data

Country of origin	Finland
Production material	acid-resistant steel
Nominal thickness	0,5 mm
Dimensions	length 2 m
Nominal weight	1,65 kg/pc
Colours	steel (HST)
Weight / package	16,5 kg

Additional information

Fastening with c/c spacing of 100 mm in a zigzag pattern using screws with wide and flat heads.
